## The World War II Veterans Portrait Project

On November 11th, the Clarke was proud to host 400 people at the museum to celebrate veterans. The event featured Kathrin Burleson's WWII veteran portraits, which were a result of her involvement with Honor Flights. This program takes World War II veterans to Washington, D.C. to see the memorial that was built in their honor. For the past two years, she has spent time drawing these remarkable men and women, and recording their stories. The portraits are now part of the Clarke's permanent collection, and can also be viewed online (<http://www.clarkemuseum.org/ww-ii-portraits.html>). If you would like to purchase a digital copy to make your own print of a portrait please contact the museum at (707)443-1947.

In connection with the portrait donation and an upcoming WWII Memorial at the Arcata airport, the museum has established a new fundraiser called "Adopt a Veteran". We are asking for the community to donate \$100 for each of the 157 veterans whose portraits are now curated by the Clarke Museum. Any amount is greatly appreciated. Just fill your donation information on the form located on the back of this newsletter. This money will not only defer the cost of professionally cataloging and preserving this collection, but also provide funding for the memorial at the airport, and allow us the flexibility to pursue other projects to help educate the public about the role local WWII veterans played in that conflict and the sacrifices they made to help protect America's values and freedoms.

To accomplish our projects we need to act fast. We want to ensure these service men and women have the opportunity to enjoy the new airport memorial and other related projects. Your support of this worthy project is greatly appreciated. Please contact us with any questions or concerns.

**CALL FOR VOLUNTEERS!** The Clarke Museum is preparing to create a float for the Annual Rhododendron Parade. The parade is scheduled to take place on Saturday, April 26, 2014. We are looking for creative people to help design and construct a float. If you are interested in volunteering to help with this special project then please contact the museum at (707) 443-1947.

## THE "HUMBOLDT TUG" REGISTER (03/1885 - 03/1890)

A large, heavy register, once in the Clarke collection, now at the Humboldt County Historical Society presents a perplexing mystery as to its origin and use. It must have reached the Clarke a long time ago, probably before 1960, when the collection was located at Eureka High School. The ledger cover has no info on it. Within the cover, in very large print, are the words: "HUMBOLDT TUG". The ledger contains 240 pages of which only the first 61 were used. Each page has 51 entry lines & 14 columns. Each line records info concerning a ship's entry, business & departure from Humboldt Bay. The 14 columns of each line contain the following information: 1) Type of vessel, 2) name of vessel, 3) captain's name, 4) point of origin, 5) date of arrival, 6) destination, 7) departure date, 8) mill(s) and/or business office(s) visited, 9) # of draft (bill?), 10) amount of lumber loaded, 11) shingles loaded, 12) shakes loaded, 13) payment for services (presumably towing), 14) date of payment. More than one person made entries over the 5 year period the ledger covers. I initially assumed this item was the log of a tugboat business. However, after having no success finding a "Humboldt Tug" company listing (or anything like it) in the directories of the period the register covered, I had to rethink that assumption. I considered the possibility it was the work of a Eureka harbor master or, less likely, an independent group, but if either case pertains, why is there absolutely no info on or within the ledger identifying its owners?

The Humboldt Steamer ran from Eureka to San Francisco. The museum has model of boat and a ticket from 1878.

**SHIP TYPES:** Schooners and steamers dominate the ship types listed in the register with a pronounced emphasis on schooners. This situation began to change on page 51 and a more or less even balance between schooner and steamer postings exist on the last 10 pages. Two steamer lines provided round-trip passenger service from San Francisco to Eureka throughout the period of time covered by the register, both working a weekly round-trip between the two locations. The steamer, Humboldt, was in use during the entire 5 years for one of the lines. The other line had as its main vessel, City of Chester, but used other vessels intermittently. Dolbeer & Carson, followed by the John Vance mill, were, according to the ledger, the local mills most prolific in shipping lumber during 1885-6. San Francisco was the dominant market for lumber shipments moving out of Humboldt Bay in that time span. San Pedro (LA) was the second largest taker. During 1886, the Southern California market (LA & San Diego) grew greatly and, at its peak, probably supplanted San Francisco as the primary market. The strength of the Southern California market lasted until the first half of 1888, then began to subside. By 1889, San Francisco had become, again, the primary market, at least as reflected in this register. Beginning with pg. 58, a severe decrease in lumber shipments occurs, continuing to the end of the register (pg. 61). The time frame (1889-1890) that matches these pages' entries also corresponds with a severe national recession.

**A FEW STRAY FACTS:** 246 boat names are recorded in the register. The first recorded instance of loading at the Pacific Lumber Co. occurred 6/27/1887. On 10/12/1888, Silver Spring became the first steamer cited in the Humboldt Tug register as loading lumber. Noted on ledger page 46: "On 8/25/1888, the City of Chester sank after colliding with the Oceanic at 9:45". This steamer, which ran a Eureka to SF route, was replaced by the Pamona.

For anyone interested in the 'HUMBOLDT TUG' mystery, the register is now at the Humboldt County History Society. A database abstracted from it (& a necessary companion catalog of ship & mill names, etc., reduced to 2-letter entries in the database) are available at the Clarke. Any ideas on the register's origins & purpose would be welcomed by Clarke personnel. ~article by Art Barab
